

# 10 Minute On-site Skin Cancer Checks

Date: Saturday, October 7th, 2023

Time: 8:00 AM – 12:00 PM

Location: Headquarters – 1456 W. Adams St. in Chicago

SKIN  
SCREENINGS  
ARE COMING  
TO YOU

## What is SkinIO?

SkinIO, a new technology that promotes earlier detection of skin cancer, is now offering fast and easy on-site skin checks.

- ❑ SkinIO provides 10-minute, total body skin exam with expert SkinIO clinician
- ❑ Disrobe to your level of comfort. The more skin you have examined, the better protected you'll be against the many places skin cancer hides
- ❑ We'll take 13 regional images of your skin – head, torso, arms, and legs – plus close-ups
- ❑ SkinIO's remote panel of dermatologists review your images. You'll get your results by email in 2-3 business days
- ❑ If results suggest you need to be seen in person, SkinIO can connect you to a dermatologist who'll see you in weeks, not months

## How does SkinIO work?

### Reserve your time

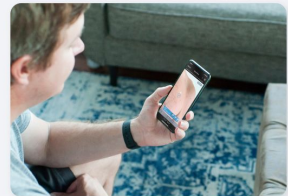

### Get screened

### Dermatologist review

### Results in just days

## Am I eligible?

Open to all members enrolled in a BCBSIL health plan, ages 18 and older at no cost to you.

Scan with your smartphone camera to  
reserve your on-site skin screening
